DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to forming a lead, classified in class 29, subclass 825.
 - II. Claims 16-20, drawn to forming a printed circuit board with conductive through holes, classified in class 29, subclass 852.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and of Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as forming conductive through holes to communicate between opposing sides of a printed circuit board, while invention Group I has separate utility such as a lead used as a catheter. See MPEP § 806.05(d).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

4. This application is in condition for allowance except for the following formal matters:
5. This application contains claims 16-20 drawn to an invention that is independent or distinct from the invention originally claimed. A complete reply to the final rejection must
